

How to setup the action.

1. Inside Photoshop, go to the ‘Window’ menu and select ‘Actions’.
A window will appear to the right hand side panel (beside layer panel).
2. Inside the Actions window panel, click on the top right hand corner icon, select ‘Load Actions...’. Choose the action (.atn) from the download.
3. The action will now appear in the actions panel.

How to use the action?

1. Open a photo.
2. Leave the photo layer as the ‘Background’. If your photo is not the Background, go to the menu ‘Layer’ ‘New’--> ‘Layer from Background..’. Please refer to the video tutorial if you need more help here.
3. Create a new layer above the background layer called ‘paint’. All text must be in lowercase.
4. With the ‘paint’ layer selected, paint onto the areas of your photo that you want to apply the effect.
5. Now “PRESS” the play button found at the bottom of the action panel.

Before “PRESS” the play button.

1. Your image is in RGB color mode and 8bits/Channel color mode.
2. Please use 300dpi image size pixel resolution around range 2000px to 5000px or above.
3. This action only run in english version of Photoshop.

What if I have 72dpi image, can I use the action?

1. Yes, you can use it.
2. Just enlarge your image, change your image size to 300dpi around range 2000px to 5000px.
Following the setup step, applying the action PRESS play button.
3. After action finished, then change back to you original image size 72dpi.
All layer in group still remain the same.

This action has been tested and working on Photoshop (English versions) CS4, CS5, CS6, CC.

If you are not using the English version of Photoshop, you can always change it to English and then back again to your native language using this method below.

Thank you for your support.
