

Pixel Explosion Effect Photoshop Action

Create pixel explosion effects to your photos with this cool 1-click Photoshop action. The result contains easy to edit layers with all the styles intact so that you can customize the appearance.

[Package contents](#)

This package contains **1 ATN file**, **1 ABR file** and this **help file**.

[Installation notes](#)

Load the ATN file in Photoshop. Go to **Windows>Actions**, click **Load actions** and you are ready to use the actions.

Load the ABR file in Photoshop. Go to **Edit>Preset Manager** and Load the brush file.

[How to use this action](#)

Open a new PSD file and add your image.

Choose the **“PIXEL EXPLOSION by PSDDUDE”** action and click Play.

[Customization](#)

The action stops for you to paint over the image where you want the pixel effect to be applied.

When the action ends you can customize this:

1. **Move the pixel layers** – There are 2 groups of layers: **pixel explosion** and **pixel masking** . You can move the entire group to the left, right, up, down or you can move each layer separately. Keep the CTRL key pressed and click on

the screen to select the pixel layer that you want to move.

2. Add more pixel effects:

- play the --- **ADD MORE PIXEL EFFECTS action** and after you have to play the **PIXEL EXPLOSION by PSDDUDE action** again.

[Need Help?](#)

If you have questions about the result and the customization don't hesitate to ask!
