HELPFILE
QUALITY STYLES PACK

BEBEL DESIGN

Hi,

Thanks for purchasing my file! If there is any question not answered by this help-file – please drop me note via the profile page on Graphicriver and I'll get back to you!

GENERAL INFORMATION

This file was created with Photoshop.

I used following fonts:

Nevis (http://www.tenbytwenty.com/products/category/typefaces)

Scriptina (http://www.dafont.com/scriptina.font)

Stam Pete (http://www.dafont.com/stampete.font)

Verdana (standart Font)

Pegypta (http://www.fontspace.com/category/egypt)

HOW TO USE AND INSTALL THE STYLES

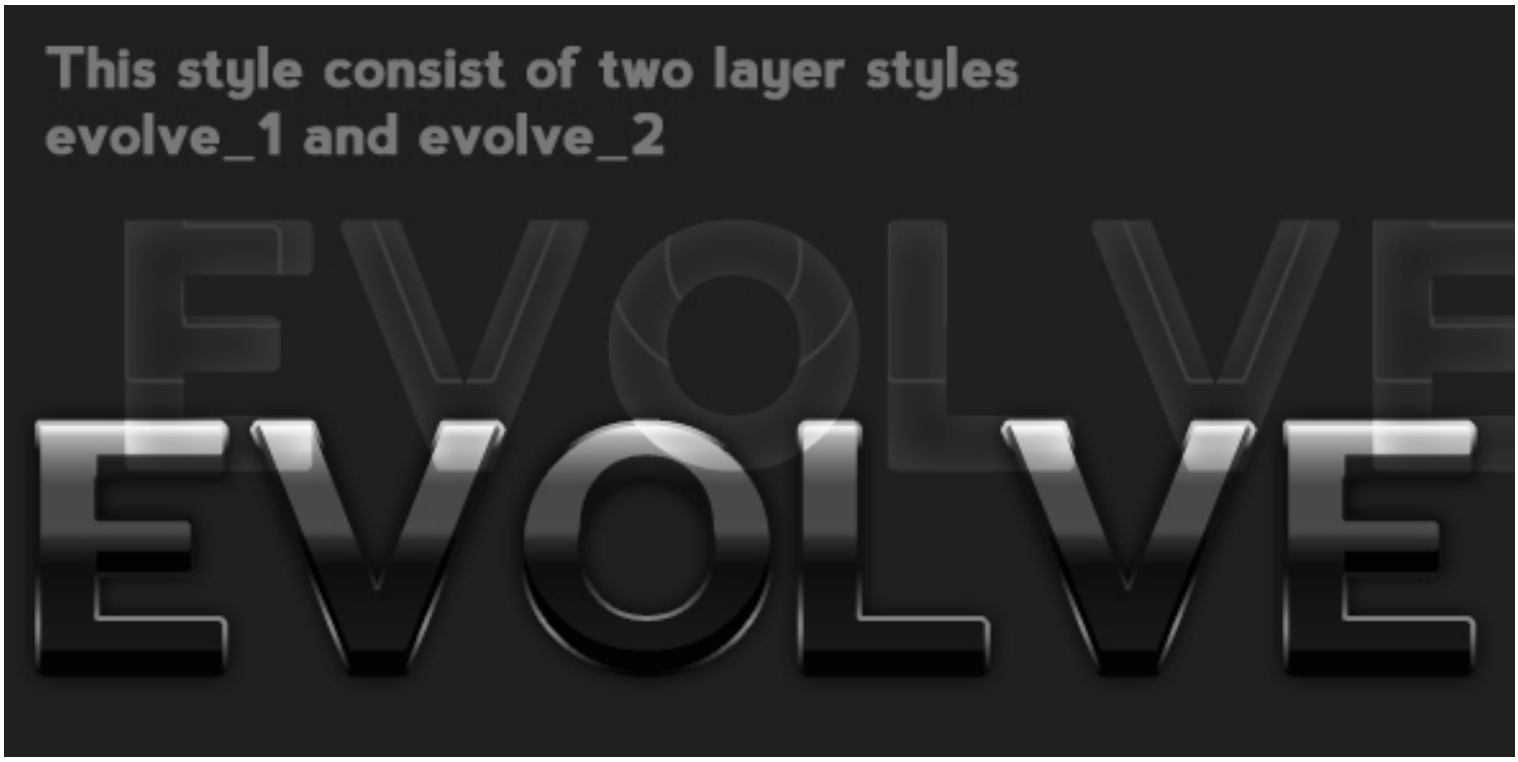

Double Click on „11stylesset.asl"

or

Open „files.psd" and customize the text the way you want! Then save the styles into your presets.

CUSTOMIZE

There is one style that needs two styles to work properly: Evolve. The layer styles are named they are named „evolve_1“ and „evolve_2“.

NEED A SPECIFIC CUSTOMIZATION?

If you need a specific customization I’m happy to help but please understand that I have to charge a fee for specific changes and customization of any of my files.

Thanks!
