

Hi!

Thank you very much for choose this template!!

In this easy help file I will show you how to use this graphic pack

You can download the fonts from here:

<https://www.fontsquirrel.com/fonts/ChunkFive>

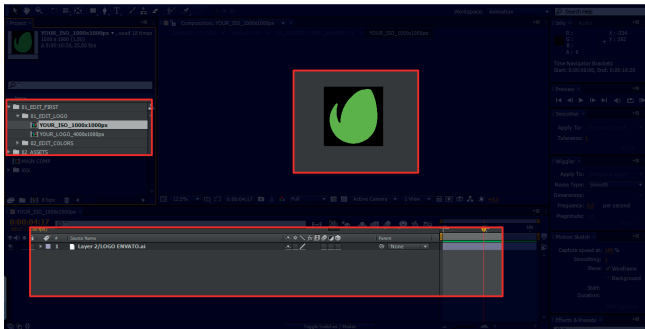

## INDEX

1. EDIT FIRST.....	02
2. ASSETS.....	04

# 1. EDIT FIRST

First of all you must follow this steps.

## Change Logo

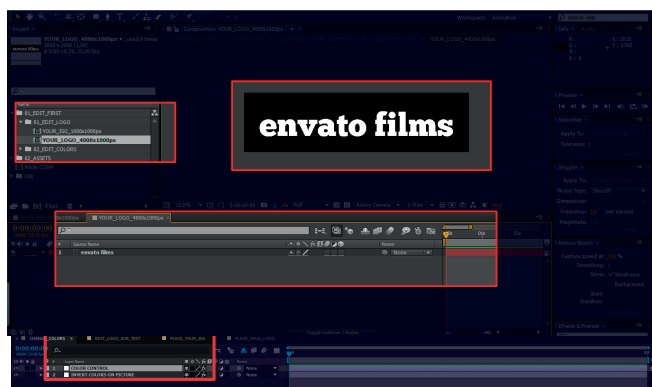

-Go to the project pannel and open the 01\_EDIT\_FIRST folder.

-Open the 01\_EDIT\_LOGO folder

-Open the YOUR\_ISO\_1000x1000px composition.

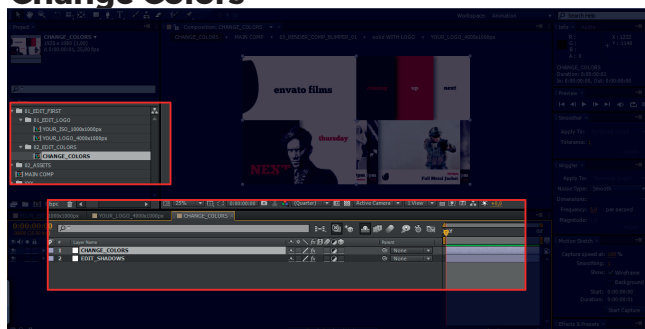

-Replace envato's isotype for yours. Please note than you will need a 1000x1000px png isotype

-Into the 01\_EDIT\_LOGO folder, open the YOUR\_LOGO\_4000x1000px composition.

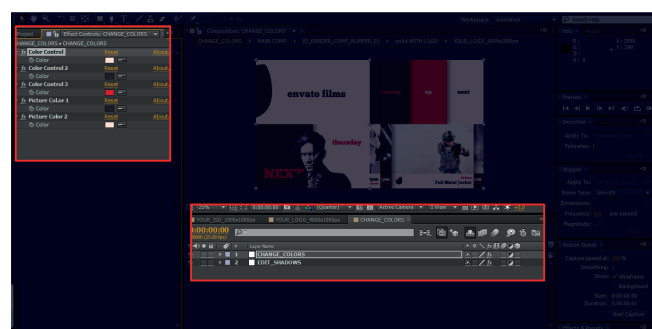

-Replace envato's logo for yours. Please note than you will need a 4000x1000px png isotype.

## Change Colors

-Go to the 02\_EDIT\_COLORS folder, into the 01\_EDIT\_FIRST folder, and get into the CHANGE\_COLORS composition.

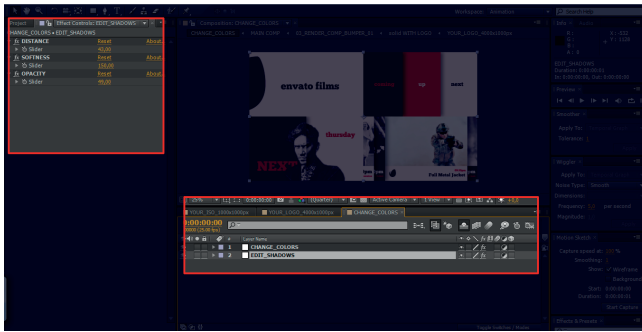

-Select CHANGE\_COLORS layer.

-Go to the Effects Panel into the CHANGE\_COLORS layer.

There you're gonna find the color controllers to change template's colors.

Please note than the 3 first controllers will affect solid colors. Controllers named Picture Col.or 1 and Picture Col.or 2 affects the footage.

-After that select the EDIT\_SHADOWS layer into the CHANGE\_COLORS composition,

-Go to the Effects Panel into the EDIT\_SHADOWS layer.

There you're gonna find the controllers to the drop shadow effect (which is applied to almost every solid in the project).

You can change: distance, softness and opacity of shadows,

## 2. ASSETS

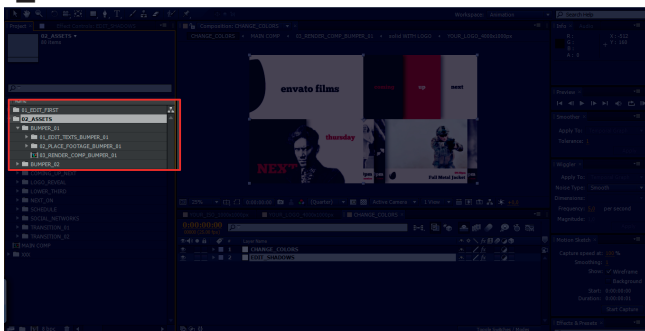

Into the Folder call 02\_ASSETS, you will find one folder for each item of this template.

Every item has the same structure with three parts:

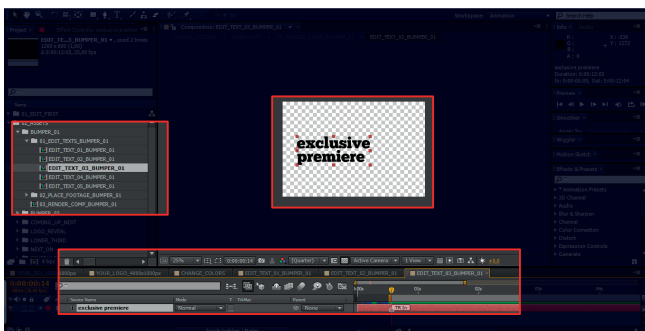

- 1) A composition or a folder with composition where you must edit texts (in case of the item has texts to edit).
- 2) A composition or a folder with compositions where you must drop your video footage (in case of the item needs footage).
- 3) The item composition that you can render or use on your project's timeline.

In this example I will show you how to customize the BUMPER\_01 item:

### 1\_Edit texts

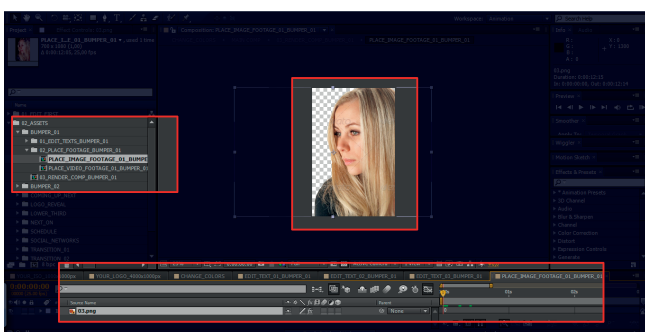

-Open the 01\_EDIT\_TEXTS\_BUMPER\_01 folder, into the BUMPER\_01 folder.

-Select each composition inside this folder, and edit each text on it.

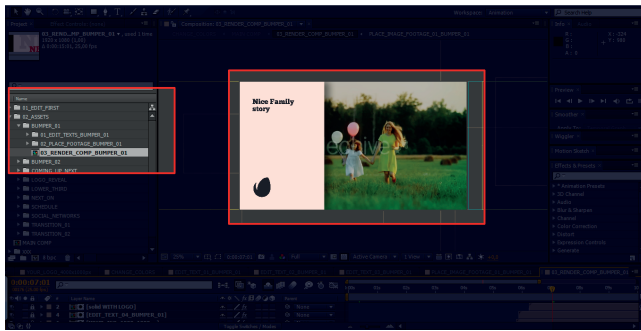

### 2\_Place footage

-Open the 02\_PLACE\_FOOTAGE\_BUMPER\_01 folder into the BUMPER\_01 folder.

-Select each composition inside this folder, and drop every footage than you want to use on this item.

### 3\_Use item composition

-Your Bumper is ready to use. Select 03\_RENDER\_COMP BUMPER\_01 composition, and drop it to your project timeline, or just render it!

**And that's all!!**

**If you still have some question just write an email to my profile adress.**
