

Quick tutorial

1

Select **Type Tool** and type any word at 80-100 pt font size:

T

TEST

2

Open: **Window > Graphic Styles** palette:

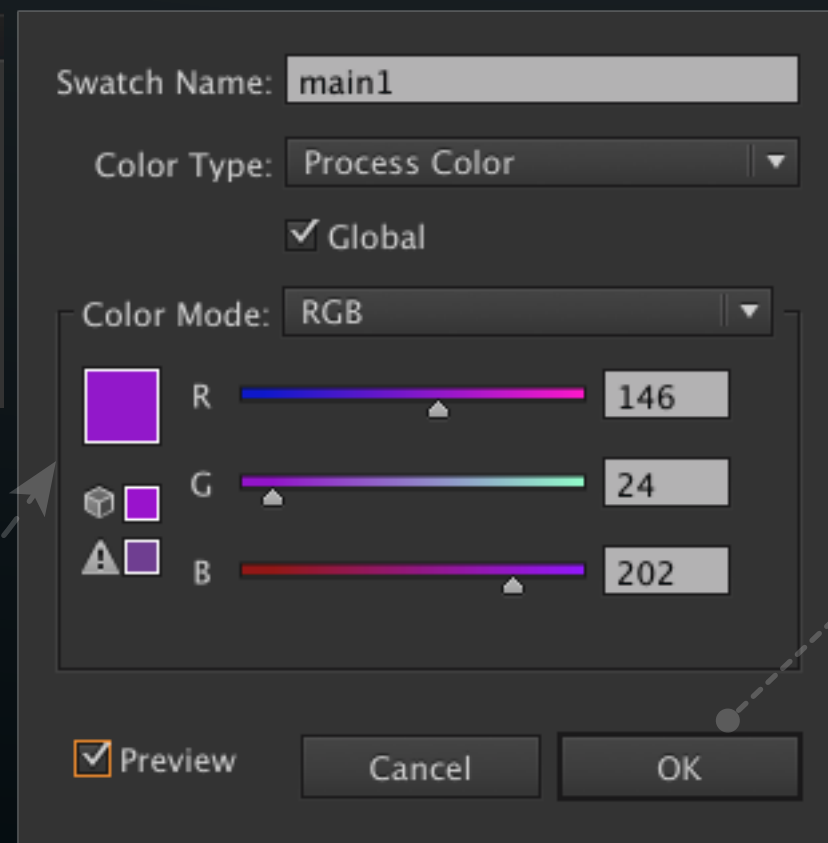

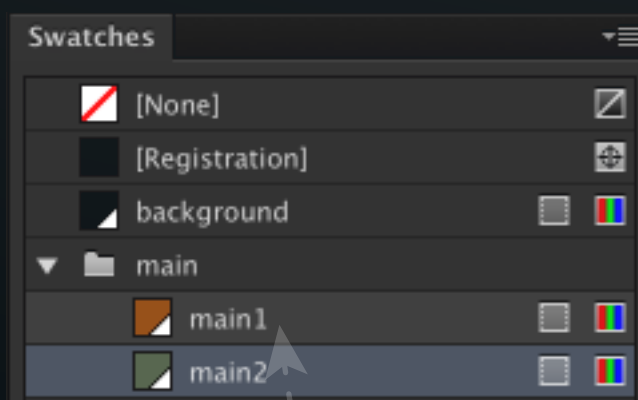

3

Select the text object with **Selection Tool (V)** and click on a style in the Graphic Styles palette:

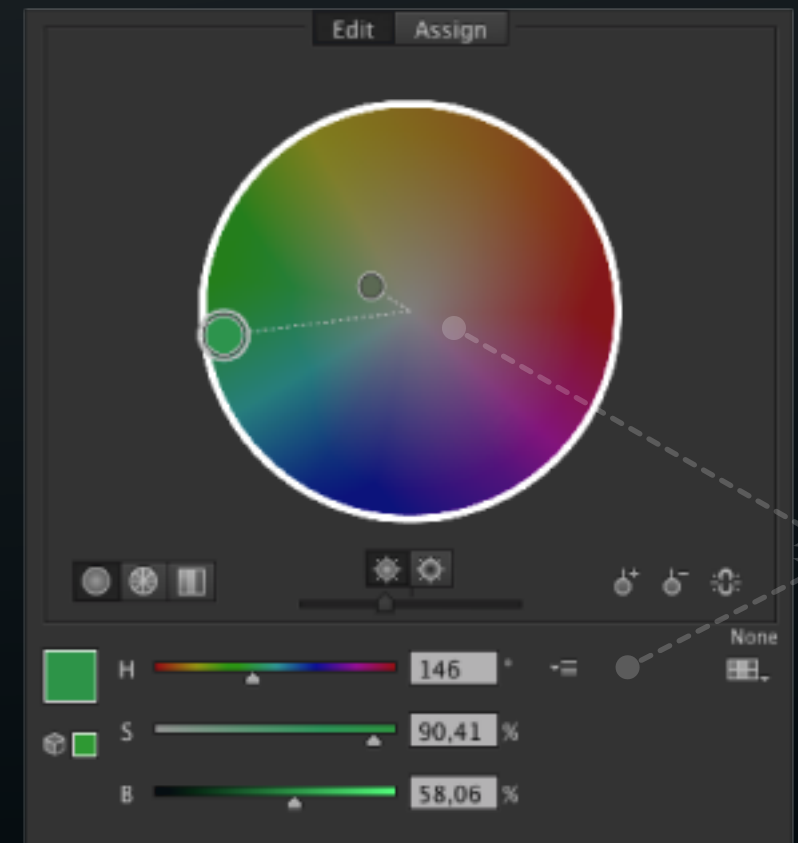

Color adjustment

Variant 1. If the Swatches palette contains global colors, just edit these colors:

Variant 2. If there are no global colors, you can change colors with **Edit > Edit Colors > Recolor Artwork**

Scaling

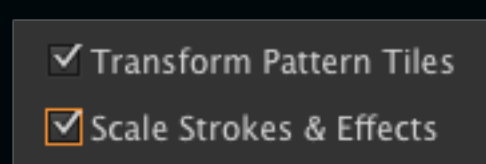

Graphic styles can be transformed when changing the size of the entire object, and can also remain unchanged.

Open the Preferences dialog and check on/off **Scale Strokes & Effects** and **Transform Pattern Tiles**.
